Advanced customization in architectural design and ...

This book presents the state of the art in advanced customization within the sector of architectural design and construction, explaining important new technologies that are boosting design, product and process innovation and identifying the challenges to be confronted as we move toward a mass customization construction industry. Advanced machinery and software integration are discussed, as ...

Advanced customization for architectural design and ...

His research and practice are focused on evolving visionary architecture and design concepts with new material systems and advanced manufacturing. Author of "Advanced Customization in Architectural Design and Construction" (2015), he presented works in various international conferences, journals and exhibitions.

CREATE — Director

Architectural design decisions are made by utilizing technical (such as patterns, tactics, and quality attribute analysis models) as well as contextual,
also called Design Rationale (DR), (such as design options considered, trade-offs made, assumptions, and design reasoning) knowledge (Babar et al.,
2006).
