[AGM Batteries | Marine Deep Cycle AGM Battery for a Boat](#)

AGM batteries use a fiberglass separator to keep the electrolyte between the lead plates. This makes AGM style batteries extremely stable in any position, even upside down. NAPA offers an AGM type battery in the Legend series, which uses a flat-plate core with AGM electrolyte separators, making it impossible for the plates to touch.

[Agm Battery Napa Agm Deep](#)

Marine batteries may be starting batteries, deep cycle batteries or dual-purpose batteries. The biggest difference between a starter battery and a cycle battery is the way they discharge their energy. Starter batteries are designed to discharge a large amount of energy on a short period of time.

[deep cycle BCI Group 31M Marine and Boat Batteries at ...](#)

AGM has very low internal resistance, is capable to deliver high currents on demand and offers a relatively long service life, even when deep cycled. AGM is maintenance free, provides good electrical reliability and is lighter than the flooded lead acid type.

[Napa Batteries - Deep Cycle Batteries - Powerstride Battery](#)

Deep cycle AGM marine batteries are sometimes referred to as dry cell batteries, non-spillable batteries, regulated valve batteries, or maintenance free batteries. They are often interchangeable with gel cell batteries.

[Batteries 101 - Automotive Battery Guide](#) [NAPA Know How Blog](#)

This write-up covers mainly the Concorde Sun-Xtender AGM's, but also applies to most other brands of deep cycle AGM batteries. In AGM batteries (also called starved electrolyte), there is a thin ultra-fine fiberglass mat sandwiched between the plates that are saturated with battery acid to about 95% of what they can hold.
