Introduction to Multilevel Modeling
Introduction to Multilevel Modeling is a two-day workshop focused on the application and interpretation of multilevel models, also known as hierarchical linear models and mixed models, for the analysis of nested data structures.

Introduction to Multi-Level Modeling

Multilevel modelling. A quick introduction. Multilevel models (MLMs, also known as linear mixed models, hierarchical linear models or mixed-effect models) have become increasingly popular in psychology for analyzing data with repeated measurements or data organized in nested levels (e.g., students in classrooms).

An Introduction to Multilevel Models 1.1 Hierarchically structured data Many kinds of data, including observational data collected in the human and biological sciences, have a hierarchical, nested, or clustered structure. For example, animal and human studies of inheritance deal with a natural hierarchy where offspring are grouped within families.
