Read PDF Analyzing The Social Web

Analyzing the Social Web provides a framework for the analysis of public data currently available and being generated by social networks and social media, like Facebook, Twitter, and Foursquare. Access and analysis of this public data about people and their connections to one another allows for new applications of traditional social network analysis techniques that let us identify things like who are the most important or influential people in a network, how things will spread through the ...

Analyzing the Social Web

Classic social network analysis studies a network's structure. In a social network, a person is considered a node or vertex, and a relationship between people is a link or edge. When all the people and relationships are identified, there are many statistics that can provide insight into the network.
