time for this release. 1. Function names cannot be referenced in the block; they will be interpreted as (undefined) labels, resulting in an error.

macos - How to fix "No manual entry for gcc"? - Stack Overflow

I am using Homebrew exclusively (i.e. I don't, and won't, use MacPorts or Fink). I also want to keep manual installations to a bare minimum. 1 But how can I install GCC?. First of all, I've of course installed Xcode but the current version doesn't ship with a decently up to date GCC (I need at least 4.5, but would prefer the most recent one) - in fact, it doesn't ship with a ...
