feed analysis and custom feed, high-grain diet, ration mixing and delivery and grass-fed vs. grain-fed beef. Tips on mineral supplements, water needs and colostrum quality.

### **Beef - Feeding and Nutrition**

Grain consumption of cattle on full-feed is ~2-2.5 lb/100 lb (1 kg/45 kg) body wt. Roughage consumption usually is limited to approximately one-fourth to one-third of the total concentrate consumption after cattle are on full-feed. Cattle consume ~3% of their body wt/day when self-fed mixed rations.
