Final for Epi all chapters Flashcards | Quizlet

Outbreak Investigations Around the World is a collection of diverse, mostly well-known case studies presenting both fundamental information and the personal experiences of each chapter's scientist-author. It represents a compilation of fascinating accounts and insightful lessons for students, professionals, and the public.

Cases in Field Epidemiology: A Global Perspective by Dr ...

Although epidemiologists work in field settings in different contexts, the term field epidemiology as used in this manual describes investigations initiated in response to urgent public health problems. A primary goal of field epidemiology is to guide, as quickly as possible, the processes of selecting and implementing interventions to lessen or prevent illness or death when such problems arise.

Outbreak Investigations Around the World: Case Studies in ...

Delay in the detection of outbreaks and inadequate preparedness and response aggravates the impact of communicable diseases, leading to increased numbers of cases, increased duration of epidemics, excess mortality and the potential for spread to other areas nationally, regionally, or globally.

Methods in FIELD EPIDEMIOLOGY

Which of the following is not a general condition in field epidemiology? The problem is expected T/F Attack rates are appropriate statistics for investigating disease outbreaks because they describe rapidly occurring new cases of disease in well defined population over a limited time period

Cases in Field Epidemiology: A Global Perspective ...

Ideal as a complement to any text on infectious disease epidemiology, these case studies will bring to life the classic functions of field epidemiology and the application of epidemiological methods to unexpected health problems that require fast, on-site investigation and timely intervention.
