If you think there is a language that should be added, please leave it in a comment along with a link with information about the language, preferably on Wikipedia or the actual language site. I give no guarantees that the links for these languages are what was meant by GitHub or TIOBE, but they do not link to an official site for the languages so I did my best in finding something.

Clipper Programming Language Wordpress

Clipper Programming Language From Wikipedia, the free encyclopedia.(*) Clipper (or CA-Clipper) is a compiler 16 bits of language xBase environment for DOS . It was created in 1984 with the purpose of being a compiler for Ashton-Tate dBase , a database manager very popular in his time.

Programming Languages - rexchloeduniya

The Python people believe Python is best for data science; it's "simpler than R" (cough cough) and, unlike R, is a general-purpose programming language. The R people believe R is better; it is built specifically for data analysis, has a larger universe of packages devoted to data analysis, and supports functional programming better.

Clipper Programming Language - WordPress.com

Clipper is an xBase compiler, which is a computer programming language, that is used to create software programs that originally operated primarily under MS-DOS. Although it is a powerful general-purpose programming language, it was primarily used to create database/business programs.
