Cloud Computing: Concepts, Technology and Architecture is the result of years of research and analysis of the commercial cloud computing industry, cloud computing vendor platforms, and further innovation and contributions made by cloud computing industry standards organizations and practitioners. This book breaks down proven and mature cloud computing technologies and practices into a series of well-defined concepts, models, and technology mechanisms.

Cloud Computing: Concepts, Technology & Architecture by ...

In Cloud Computing: Concepts, Technology & Architecture, Thomas Erl, one of the world's top-selling IT authors, teams up with cloud computing experts and researchers to break down proven and mature cloud computing technologies and practices into a series of well-defined concepts, models, technology mechanisms, and technology architectures, all from an industry-centric and vendor-neutral point of view. In doing so, the book establishes concrete, academic coverage with a focus on structure ...

Powerpoints for Cloud Computing: Concepts, Technology ...

"Cloud Computing: Concepts, Technology & Architecture is a comprehensive compendium of all the relevant information about the transformative cloud technology. Erl's latest title concisely and clearly illustrates the origins and positioning of the cloud paradigm as the next-generation computing model.

Cloud Computing: Concepts, Technology & Architecture [Book]

Clouds are distributed technology platforms that leverage sophisticated technology innovations to provide highly scalable and resilient environments that can be remotely utilized by organizations in a multitude of powerful ways.

Cloud Computing: Concepts, Technology & Architecture ...

In Cloud Computing: Concepts, Technology & Architecture, Thomas Erl, considered one of many world's prime-selling IT authors, groups up with cloud computing specialists and researchers to interrupt down confirmed and mature cloud computing utilized sciences and practices proper into a set of properly-outlined concepts, fashions, technology mechanisms, and technology architectures, all from an business-centric and vendor-neutral perspective.
