# Get Free Comparison Microsoft Remote Desktop Services Vs Citrix Xenapp

Microsoft Remote Desktop Services (RDS), previously called Terminal Services, has been with us for 15 years. Virtual desktop infrastructure (VDI), on the other hand, is still getting its engine going in many organizations.. To help you choose the right path for your environment, see how VDI and RDS stack up against one another in this desktop virtualization comparison.

## Microsoft Windows Remote Desktop Services vs. Citrix ...

Remote Desktop Services (RDS) is an IT term for Microsoft Windows Server features that allow users to remotely access Windows applications and desktops with a graphic user interface. The client device requires an RDS client and the RDS server requires a Windows Server OS to establish a remote connection with one or more RD Session Hosts (Terminal Servers).

Comparison Microsoft Remote Desktop Services versus Citrix Xenapp

1.1. Presentation and delivery of applications

- With Citrix XenApp you can publish applications in a very easy way with a central console.
- With MS RDS you need to publish applications on each MS RDS server separately, no easy central administration is available.

1.2.

deploy and manage your virtualization environment.

## Top desktop as a service (DaaS) providers: Amazon, Citrix ...

Each user or device accessing a licensed Windows Server requires a Windows Server CAL or a Windows Server and a Remote Desktop Services (RDS) CAL. With the User CAL, you purchase a CAL for every user who accesses the server to use services such as file storage or printing, regardless of the number of devices they use for that access.

## Comparison of remote desktop software - Wikipedia

We as an entire company started using Remote Desktop Services about 6 years ago. We wanted to provide a way for multiple staff working outside the office to have access to data files on the network. The simplest method we came up with was to setup Remote Desktop Services with Microsoft Terminal Services.

## Comparison Microsoft Remote Desktop Services - Citrix Xenapp

To ensure you are in compliance with the Remote Desktop Services license terms, track the number of RDS Per User CALs used in your organization and be sure to have enough RDS Per User CALs installed on the license server for all of your users. You can use the Remote Desktop Licensing Manager to track and generate reports on RDS Per User CALs.

## Windows Server Remote Desktop Services CAL - microsoft.com

Remote Desktop Services (RDS): Formerly known as Terminal Services, multiple users share the same OS and applications running in the server, known as the “RD Session Host.” Shared sessions is the way Terminal Services handle thin clients. The user’s machine functions like an input/output (I/O) terminal to the central server.

Still a very green product: while Microsoft offers a lot of the same features as the big guys, it's obvious that Remote Desktop Services is still in it's infancy and has a lot of room for growth. I have discovered and requested fixes for a number of bugs in the mobile app alone - something about the QA process for these apps seems to be lacking.
