Heterosis - Wikipedia

Heterotic string theory. In string theory, a heterotic string is a closed string (or loop) which is a hybrid ('heterotic') of a superstring and a bosonic string. There are two kinds of heterotic string, the heterotic SO(32) and the heterotic E8 × E8, abbreviated to HO and HE. Heterotic string theory was first developed in 1985 by David...

Development of Heterotic Groups (G. hirsutum vs G ...

Basic contents of heterotic group theory Concepts of heterotic group and heterotic pattern Heterotic groups are a set of inbred-line populations with rich genetic background, high kinship coefficient, similar main characteristics trend, and strong general combining ability.

HETEROTIC GROUPING AND ITS IMPORTANCE IN TROPICAL HYBRID ...

Heterotic groups and patterns are of fundamental importance in hybrid breeding. We start with definitions of these terms.

Heterotic groups: State Plant Breeding Institute, Research ...

the concept of heterotic groups and patterns, (iii) describe the status of heterotic patterns in different regions, and (iv) discuss strategies for the establishment of heterotic patterns. HETEROSIS Nearly 50 years after the seminal heterosis conference was held at Iowa State College (GOWEN, 1952), CIMMYT organized in 1998 an international

Concept of Heterotic Group and its Exploitation in Hybrid ...

Concept of Heterotic Group and its Exp loitation in Hybrid Breeding Ashok Kumar Meena 1* , Deshraj Gurjar 2 , S.S. Patil and Bheru Lal Kumhar 3 1 University of Agriculture Sciences Dharwad, Dharwa ...

Maize Origins and Heterotic Groups | Seed In Context Blog

valuable in achieving this increase is the exploitation of heterosis and the development of commercial hybrids in wheat and rice, the two major food cereals. Hybrid rice is now a viable commercial product in countries such as China and India that rely on this plant as their major food cereal.

Group Theoretical Aspects in Heterotic String Theory

The term heterotic group refers to 'a group of related or unrelated genotypes from the same or different populations, which display similar combining ability and heterotic response when crossed with genotypes from other genetically distinct germplasm groups' (Melchinger and Gumber, 1998).

Concepts and Breeding of Heterosis in Crop Plants

In the earlier stage of hybrid rice development in China, two heterotic groups, that is, early season indica from southern China and mid- or late-season indica from Southeast Asia were identified for three-line hybrid rice based on wild abortive (WA) male sterile cytoplasm (Yuan 1977).

Determination of heterotic groups for tropical Indica ...

Group Theoretical Aspects in Heterotic String Theory Bachelorarbeit in Physik von Pascal Dominic Cremer ... One of the main ideas of string theory is to extend this concept of unification and ... In Section 2 the basic concepts of heterotic string theory

Formation and Development on the Conception of Heterotic ...

Maize Origins and Heterotic Groups. The article was published by a group of researchers at several universities which have been involved in tracking the origins of maize: Genetic signals of origin, spread, and introgression in a large sample of maize landraces I found relating the heterotic patterns which corn breeders know to the graph in the article to be very interesting.

Concept Of Heterotic Group And

Definition of heterosis and the concept of heterotic grouping The phenomenon of heterosis was first detected in maize. Shull defined heterosis in 1914 as, "The increased vigour, speed of development, resistance to disease and insect pests, or to climatic rigours of any kind, manifested by crossbred organisms

(PDF) Concept of Heterotic Group and its Exploitation in ...

Melchinger and Gumber (1998) defined a heterotic group "as a group of related or unrelated genotypes from the same or different populations, which display similar combining ability and heterotic response when crossed with genotypes from other genetically distinct germplasm groups."

Methods for developing heterotic groups ~ Breeding & Plant ...

Melchinger and Gumber (1998) defined a heterotic group as a group of related or unrelated genotypes from the same or different populations, which display similar combining ability and heterotic response when crossed with genotypes from

HETEROSIS AND HETEROTIC PATTERNS IN MAIZE

Heterotic groups and heterotic patterns form an integral part of hybrid breeding and help breeders to utilize their germplasm in a more efficient manner avoids unnecessary crosses to be made.

Heterotic string theory - Wikipedia

Heterotic patterns have been studied in various species. For certain crops, breeders have defined standard patterns that guide in the production of hybrids. As previously indicated in maize, for example, a widely used scheme for hybrid development in temperate maize is the Reid _ Lancaster heterotic pattern.

B Haussmann Definition of heterotic grouping

heterotic groups. Concept of heterotic groups and pattern The phenomenon of heterosis was first detected in maize. Shull defined heterosis in 1952 as, —The increased vigour, speed of development, resistance to disease and insect pests, or to climatic rigours of any kind, manifested by crossbred organisms as

(PDF) Concept of heterotic groups and reciprocal recurrent ...

A heterotic group may be defined as a group of related or unrelated genotypes from the same or different populations, which display similar combining ability when crossed with genotypes from other germplasm groups.

Concept of heterotic relationship ~ Breeding & Plant Genetics

Crosses between inbreds from different heterotic groups result in vigorous F1 hybrids with significantly more heterosis than F1 hybrids from inbreds

within the same heterotic group or pattern. Heterotic groups are created by plant breeders to classify inbred lines, and can be progressively improved by reciprocal recurrent selection. Heterosis is used to increase yields, uniformity, and vigor. Hybrid breeding methods are used in maize, sorghum, rice, sugar beet, onion, spinach, sunflowers ...

Book: Concepts and Breeding of Heterosis in Crop Plants ...

Formation and Development on the Conception of Heterotic Group and Their Heterotic Pattern in Maize(*Zea mays* L.) ZENG Meng-qian 1, JI Hai-lian 2, LI Jiu-yun 3, SANSEN Jianpatong 4: 1. Institute of Genetics and Developmental Biology, Chinese Academy of Sciences, Beijing 100101, China;
