Concept-Development 8-1 Practice Page

Concept-Development Practice Page Non-Accelerated Motion I. The sketch shows a ball rolling at constant velocity along a level floor. The ball rolls from the first position shown to the second in 1 second. The two positions are 1 meter apart. Sketch the ball at successive 1-second intervals all the way to the wall (neglect resistance). a.

---

Concept-Development 2-1 Practice Page

Comparing the concepts of mass and weight, one is basic—fundamental— depending only on the internal makeup of an object and the number and kind of atoms that compose it. The concept that is fundamental is (mass) (weight). The concept that additionally depends on location in a gravitational field is (mass) (weight).

Concept-Development 25-1 Practice Page

CONCEPTUAL PHYSICS PRACTICE PAGE Chapter 4 Newton's second Law of Motion  $a = \Delta v / \Delta t$ . Learning physics is learning the connections among concepts in nature, and also learning to distinguish between closely-related concepts. Velocity and acceleration, previously treated, are often confused. Similarly in this chapter, ..

Concept-Development 5-1 Practice Page

Authored by Paul Hewitt, the pioneer of the enormously successful "concepts before computation" approach, Conceptual Physics boosts student success by first building a solid conceptual understanding of physics. Hewitt's 3-step learning approach--explore, develop, and apply--makes physics more accessible for today's students.
