### ~~5 Popular Free and Open Source Construction Estimating and ...~~

Estimating construction materials starts with a basic count of the framing lumber, often called a framing takeoff. A takeoff for a wall frame includes counting the studs (typically 2x4 or 2x6), the headers for door and window openings (using 2x12s is simplest), and horizontal plates for the top and bottom of the wall (plates use the same lumber as the studs).

### ~~Construction Takeoff Sheet | Construction Estimating ...~~

The summary sheet is a quick overview of all the costs of construction broken down into major work categories such as excavating, framing materials, framing labor, and roofing. The summary sheet is similar to the Cost Summary Breakdown Sheets that banks and mortgage companies give out with their construction loans.

### ~~Construction Material Takeoff—Excel Spreadsheet & Templates~~

After spending years with a tri-scale and calculator I did my best at coming up with an (relatively) automated lumber take-off spread sheet. I realize that this is specific to how I build and what materials we use around here. In the past I have seen threads asking for something like this.
