~~Crimes against Nature: Environmental Criminology and ...~~

Transnational environmental crime is that which is truly global in scope, and that reflects broad socio-economic processes and trends associated with globalisation. The diversity and complexity of such harm can be understood in terms of national borders and international social processes, and the pressures and limits of economic life as shaped by the dictates of 21st century capitalism.

~~Crimes Against Nature Environmental Criminology~~

Crimes Against Nature provides a systematic account and analysis of the key concerns of green criminology, written by one of the leading authorities in the field. The book draws upon the disciplines of environmental studies, environmental sociology and environmental management as well as criminology and socio-legal studies, and draws upon a wide range of examples of crimes against the environment - ranging from toxic waste, logging, wildlife smuggling, bio-piracy, the use and transport of ...
