Much like video, DVD and even mobile phones, each type of Vehicle Unit does basically the same thing, but in a different way. More detailed help for using each type of Vehicle Unit is therefore included.

Free easy to understand guides for all types of tachograph ...
What is a tachograph? A tachograph is a means of ensuring that all driving activity for a particular vehicle and driver can be recorded, including driving time, speed and distance. Its purpose is to ensure that all drivers and employers adhere to the laws on drivers' hours. Historically, tachographs used a paper chart record, but all new vehicles now use a digital system, whereby the driver uses their own card inserted into the vehicle unit.

Tachosys - Digital Tachograph User Guide
The Digital Tachograph Vehicle Unit (VU) is an electronic device that is able to record and store driver and vehicle records. The VU must have the ability to store this data for at least 365 days and must make it possible to download that data.
