Chemical kinetics, the branch of physical chemistry that is concerned with understanding the rates of chemical reactions. It is to be contrasted with thermodynamics, which deals with the direction in which a process occurs but in itself tells nothing about its rate. Thermodynamics is time's arrow.

What They Do: Chemical engineers apply the principles of chemistry, biology, physics, and math to solve problems that involve the use of fuel, drugs, food, and many other products.. Work Environment: Chemical engineers work mostly in offices or laboratories.They may spend time at industrial plants, refineries, and other locations, where they monitor or direct operations or solve onsite problems.
