Encyclopedia Of Exercise Anatomy

THIRST. THIRST. Thirst is a conscious sensation that results in a desire to drink. Although all normal humans experience thirst, science can offer no precise definition of this phenomenon because it involves numerous physiological responses to a change in internal fluid status, complex patterns of central nervous system function, and psychological motivation.

Exercise. The best solutions to cellulite problems involve reducing subcutaneous fat through diet and exercise. Working out for at least 30 minutes five times a week firms up the skin by increasing muscle tone and keeping connective tissue fibers healthy. Exercise also increases blood circulation to these problem areas. Diet
