FerrariChat - The world's largest Ferrari community

If the above happened, one bank of six of your 12 total cylinders may have failed first (just speculating here). If that happened, then you would feel a huge loss in power and also have problems accelerating. You might also cause an engine fire, due to the unignited fuel ingiting in your catalytic converters. This is all speculation.

Ferrari flat-12 engine - Wikipedia

Replacing Your OEM Catalytic Converter/s may trigger a CEL (Check Engine Light). To disable a recurring CEL you will need to tune the ECU or use O2 Sensor Extensions.. For Ferrari, Audi R8, and McLaren Applications you can alternatively use Capristos Plug & Play OBD Wizard Solution for removing CELs.

ferrari Service Repair Manual

The Ferrari flat-12 engine family is a series of 180° V12 DOHC petrol engines produced by Ferrari from 1973 to 1996. Introduced with the 365 GT4/BB, this engine shared its construction with the flat-12 race-engines used in the 312B and 312 PB, but its displacement, bore & stroke, rods and pistons were the same as the Tipo 251 60° V12 Colombo engine powering the Daytona it replaced.
