Transmission Jumps Out of Gear There are several possible reasons why the Mustang's manual transmission unexpectedly jumps out of gear. Perhaps the most common cause is due to the misalignment of the transmission's case or clutch housing. A worn pilot bearing at the rear of the crankshaft can also be the culprit, as can a bent transmission shaft.

Picking up a Mustang with a manual transmission allows you to feel many aspects of the car that an automatic transmission just doesn't. For example, with a manual gearbox, you have to pay close attention to your RPM to know when to shift. This can come into play when you're at a road course event or carving some corners on a random back road.
