Ford Puma Performance, Engine, Ride, Handling | What Car?

Completed engines are shipped from Japan to Ford's Cologne plant where the Puma is assembled. 'This low-volume assembly operation would not be practical within one of Ford's own conventional engine plants,' says the company's Puma press documentation. Planned volume for the Puma is 20,000 units a year.

Ford Puma (sport compact) - Wikipedia

Ford Puma's 125 PS 1.0-litre EcoBoost engine will deliver 131 g/km CO₂ emissions and 5.8 l/100 km fuel efficiency. A diesel powertrain option and seven-speed automatic dual-clutch transmission will join the line-up after launch.

The Ford Duratorq engine, commonly referred to as Duratorq, is the marketing name of a range of Ford diesel engines first introduced in 2000 for the Ford Mondeo range of cars. The first design, codenamed "Puma" during its development, replaced the older Endura-D unit which had been around since 1984.

Ford Puma Engine

The Ford Duratorq engine, commonly referred to as Duratorq, is the marketing name of a range of Ford diesel engines first introduced in 2000 for the Ford Mondeo range of cars. The larger capacity 5-cylinder units use the Power Stroke branding when installed in North American-market vehicles. The first design, codenamed "Puma" during its development, replaced the older Endura-D unit which had been around since 1984. Commercial versions of the Puma unit replaced Ford's older "York" type unit used
