~~Understanding Your Child's Brain Development~~

Skills such as taking a first step, smiling for the first time, and waving “bye bye” are called developmental milestones. Children reach milestones in how they play, learn, speak, act, and move (crawling, walking, etc.). Click on the age of your child to see the milestones: “Learn the signs ...

years was also a vital part of the process. Many early childhood professionals have contributed to the development of these documents.

~~THE JAMAICA EARLY CHILDHOOD CURRICULUM GUIDE~~

Your child experiences many developmental changes before heading off to kindergarten. During the first five years of your child's life, he goes through a long list of developmental changes. The time seems to pass so quickly, and before you know it, your newborn baby has become a toddler, then a preschooler and finally he's ready for school.

~~How a Child Develops from Birth to Five Years Old | How To ...~~

At birth, your child has billions of neural cells, but very few working connections. Although we are born with all the neural cells we'll ever need, they are small and mostly unconnected to the different parts of the brain. Over time, these

~~Early Years Entitlements | Lincolnshire County Council~~

From birth to age 5, a child's brain develops more than at any other time in life. And early brain development has a lasting impact on a child's ability to learn and succeed in school and life. The quality of a child's experiences in the first few years of life - positive or negative - helps shape how their brain develops.

~~Stages of Human Development: Birth to 5 Years~~

Developmental milestones are things most children can do by a certain age. Check the milestones your child has reached by the end of 5 years by completing a checklist with CDC's free Milestone Tracker mobile app, for iOS external icon and Android external icon devices, or by printing the checklist pdf icon [294 KB, 2 Pages, Print Only] below
