UTILISATION Materials

The CMT process has a universal range of application. The specific know-how can be used for all materials. Applications

Whether as an automated or a manual application, the CMT Process is suitable for use in all industrial sectors:

## ~~CMT: Cold Metal Transfer~~

The TPS/i is much more than just a tool - instead, it is a welding partner that communicates with the user in many different ways. The intuitive plain-text display gives users information on all machine parameters in the form of descriptive texts, and the system automatically detects all available components and warns

power source is suitable for MIG/MAG, TIG and electrode welding, as well as manual or robotic applications. CMT stands for Cold Metal Transfer. The wire movement is incorporated into the process control, where heat is inserted only very briefly. Metal transfer takes place with barely any flow of current.
