I got the manual from B&S and it is about useless for my purposes. It describes older B&S generators and an occasional older Generac, but has absolutely nothing about a 10K EXL with two circuit boards in the control system and no hardware mounted on top of the generator housing. Doesn't show any of the diagnostics I needed.

Utility power isn't always available where and when you need to tackle home improvement projects. Take a Generac portable generator to that far corner of your property instead of running lengthy extension cords. Or rely upon portable power if you need to turn off utility power for extensive home improvement work.
