Grounded Theory and Grounded Theorizing: Pragmatism in ...
Grounded theory and grounded theorizing : pragmatism in research practice Bryant , Antony The grounded theory method is founded on a view of analysis whereby the research questions and potential hypotheses are not articulated at the outset; rather, the researcher initially seeks to gain familiarity with a research context, and only in later stages does the process become progressively more focused and targeted.

Conceptualization: On Theory and Theorizing Using Grounded ...
Conceptualization is the core category of Grounded Theory (GT). We all know or have an idea what conceptualization is in general. In this article, I will detail those properties of conceptualization which are essential for generating GT. I have discussed at length, in *Doing Grounded Theory* (Glaser, 1998), the conceptual license that GT offers ...

The book is addressed to investigators with some knowledge of and familiarity with research methods who are keen to learn more about the grounded theory method [GTM]. The method is located against general research issues, such as the nature of doctoral and other research, discussions on epistemology and ontology, and the initial motivations for undertaking a specific research project.

" Grounded theory refers to a set of systematic inductive methods for conducting qualitative research aimed toward theory development. The term grounded theory denotes dual referents: (a) a method consisting of flexible methodological strategies and (b) the products of this type of inquiry. Increasingly, researchers use the term to mean the methods of inquiry for collecting and, in particular, analyzing data.

Grounded theory methods involve a highly recursive process whereby researchers gradually refine their analyses and budding theory by going back and forth between their empirical observations, the emerging conceptualization, and possible existing theory (Dey, 1999; Gasson, 2003). In what follows, for purposes of clarification, while acknowledging the recursive character of grounded theory methods, we analyze how the reviewed papers tackled three essential aspects of such research: data ...

Coding text and theorizing: In grounded theory research, the search for the theory starts with the very first line of the very first interview that one codes. It involves taking a small chunk of the text where line by line is being coded. Useful concepts are being identified where key phrases are being marked. The concepts are named.

The self-defined purpose of grounded theory is to develop theory about phenomena of interest. But this is not just abstract theorizing they're talking about. Instead the theory needs to be grounded or rooted in observation - hence the term. Grounded theory is a complex iterative process.

Grounded theory - Wikipedia

What is Grounded Theory? All research is "grounded" in data, but few studies produce a "grounded theory." Grounded Theory is an inductive methodology. Although many call Grounded Theory a qualitative method, it is not. It is a general method. It is the systematic generation of theory from systematic research.
