Solutions And

When a mixture of two liquids with different boiling points is gradually heated, the liquid with the lower boiling point will transition into a gas first. This gas can be collected in a separate container to cool, where it changes back into a liquid—separating the original mixture.

Solutions and Mixtures

Before we dive into

solutions, let's

separate solutions from

other types of

mixtures. Solutions are

groups of molecules

that are mixed and

evenly distributed in a

system. Scientists say

that solutions are

homogenous

systems. Everything in

a solution is evenly

spread out and

Acces PDF

Harcourt

Solutions And

thoroughly mixed.
