The Truth About The Evo Engine

"It really wasn't until the Evolution bikes came along that Harley-Davidson was considered to be a company that had gotten their act together. These bikes sold really well from the start," Krummel recalls. Due to the Evolution engine's all-aluminum construction, there were a few problems early on with finding the right bottom end gaskets.

A brief history of the Harley-Davidson Evolution Engine ...

The Evolution engine (popularly known as Evo) is an air-cooled, 45-degree, V-twin engine manufactured from 1984 by Harley-Davidson for the company's motorcycles. It was made in the 1,340 cc (82 cu in) displacement for Harley-Davidson Big V-twins bikes, replacing the Shovelhead engine until 2000 when the last EVO was placed in a production factory custom FXR4 (FXR2 and FXR3 were the first CVOs).
