This type was introduced in 1990 and is known now as King Air 350. Besides the changes to the fuselage the 350 was given a higher MTOW of 15,000 lb. From 1998 Beechcraft implemented the UltraQuiet active noise canceling system as standard on all King Air 350s. In 2003, the 350 avionics were upgraded.

~~King Air 100 - KingAirNation~~

The King Air 100 is a stretched derivative of the Beech 90 commuter aircraft, sharing their short 45.9-ft. wingspan. But the Model 100 aircraft are upgraded with a modestly pressurized fuselage that has five round windows on each side of the main seating area, plus two smaller windows in the aft cabin. Versatility is the King Air 100's virtue.

~~Beechcraft King Air 90, 100 and 200~~

The F90 offered the same ultracomfortable, 54-inch-wide cabin as the C90, combined with the reduced wingspan of the King Air 100, but the F90's extra power made a major difference in performance. It also positioned the new F90 closer to the ultraluxurious 200 than to the C90. Short wings and plentiful horsepower are part of the formula that ...

~~Textron Aviation | Technical Publications~~

The Beechcraft King Air family is part of a line of American utility aircraft produced by Beechcraft. The King Air line comprises a number of twin-turboprop models that have been divided into two families. The Model 90 and 100 series developed in the 1960s are known as King Airs, while the later T-tail Model 200 and 300 series were originally marketed as Super King Airs, with the name "Super ...
