~~Types of Crabs: Varieties from Around the World (with ...~~

A crab can breathe underwater but can also breathe out of water for long periods. Whether the tide is in or out, these animals can survive. Crabs need to cope with threats from the air, land and sea. Birds will eat them, fish will eat them, even people will eat them. The crab's tough shell and spines provide some defense against predators.

~~King Crabs of the World—ResearchGate~~

This book is the first comprehensive scientific reference devoted to the biology and fisheries of king crabs.

~~Tholepin: King Crab Decline Examined~~

King crabs are a taxon of crab-like decapod crustaceans chiefly found in cold seas. Because of their large size and the taste of their meat, many species are widely caught and sold as food, the most common being the red king crab (*Paralithodes camtschaticus*).. King crabs are generally thought to be derived from hermit crab-like ancestors within the Paguridae, which may explain the asymmetry ...
