MODULE 5: Hemoglobin and Myoglobin, Lectures 12 Quadrant-2 ...

Various aspects of MATLAB programming for numerical computation will be covered in these modules, with each module dedicated to an equivalent numerical topic. Each module will be covered in one week, with 2-2.5 hours lectures per week. There will be self-study problems at the end of several of these lectures.

Lecture 05 Pointers ctd.. Note: some notes here are the same as ones in lecture 04 1 Introduction A pointer is an address in the memory. One of the unique advantages of using C is that it provides direct access to a memory location through its address. A variable declared as int x has the address given by &x. & is a unary operator
