## Medical Complications of Lung Transplantation ...

Once your surgery has been completed and the lung transplant is a technical success, the issue of successfully living with a transplant becomes quite involved. The two major issues are rejection and infection. Lung transplant recipients undergo specialized rehabilitation programs.

## Lung Transplantation: Coping After a Lung Transplant ...

A specific issue to the COPD population is the impact of bronchoscopic [bronchoscopic lung volume reduction (BLVR)] or LVRS on listing for lung transplantation.

## The Journal of Heart and Lung Transplantation - Elsevier

The two main complications of transplant surgery are organ rejection and infection. Since the body recognizes the new lung as a foreign object, it will normally try to get rid of it or "reject" it. Anti-rejection drugs taken after surgery help prevent a rejection episode, but they also inhibit part of the immune system.

## Unexpect the Expected: What I Learned After My Lung Transplant

A lung transplant is an effective treatment for disease that has destroyed most of the lungs' function. For people with severe lung disease, a transplant can bring back easier breathing and provide years of life. However, lung transplant surgery has major risks and complications are common.

## Lung Transplant Recovery | UCSF Health

The following are a list of general medical conditions which are felt to impact on the long-term outcome of lung transplant recipients. Medical or psychosocial treatment to address these issues should be instituted when appropriate in patients who do not currently, but may ultimately, meet the criteria for lung transplantation.

## Lung Transplant - Department home - Mayo Clinic

Prior to the transplant, my lung function was so low that no oxygen reached the lower lobes of my lungs and my respiratory rate had increased drastically. This is because low lung function
