TIG Welders | Welders & Accessories | Welding Products ...

I'm new to TIG and recently purchased a Miller Syncrowave 180 SD. After about three bottles of Argon, I'm fairly confident with it for all steel, most Stainless and some Aluminum jobs. I still have to develop my technique adding filler rod to the Aluminum but it looks ok. My question to you guys is, how the @#\$%^ do I weld Aluminum sheet? I just can't keep from melting it into a mess!

Miller TIG Welders - TIG Welding and GTAW Welding Machines ...

I am thinking of buying a tig welder so I can start turbo manifold and roll cage fabrication. Is a miller syncrowave 180sd a good tig welder to start with? It is kinda on the high end of my budget, but doable. Are there any other welders out there that are better for the money, or should I just keep saving for a better welder? If so, which welder?

miller syncrowave 180 tig welder | eBay

TIG Welder, Diversion 180, 120-240VAC ... 5.0 out of 5 stars Miller 180 diversion tig welder. November 12, 2017. Verified Purchase. I have been using this diversion180 for a few weeks now and it is a very nice machine, easy to set up and use adjustments are easy to make. It does a real nice job on both aluminum and steel!

[Is a miller syncrowave 180sd a decent tig welder? | DIY ...](#)

TIG (especially a 180 Synchronwave) is best suited to thin materials that are tightly fitted. Rule of thumb on steel, your electrode diameter should be equal to the material you are welding. Your amps should be equal to the thickness of the material. Your electrode diameter should be no smaller than the amps you are running.
