So, in how far this satire about life in the communist "Moscow Republic" of 2042 is still relevant? I would not exclude the alarming possibility that Russia might still evolve in something like the nightmare of "Moscow 2042".

Moscow 2042 is a 1986 novel by Vladimir Voinovich. In this book, the alter ego of the author travels to the future, where he sees how Communism has been successfully built in the single city of Moscow, but it soon becomes clear that the political system in the country is not a utopia and that Russia is ruled by the "Communist Party of State Security" which combines the KGB, the Communist Party, and the Russian Orthodox Church. The party is led by former KGB general Bukashin who met previously wi

Vladimir Voinovich

Written by Soviet exile Vladimir Voinovich in 1986, about taking a time machine 60 years into the future from Munich, Germany in 1982 to Moscow in 2042. I don't want to give away much, but he goes to an incredibly bizarre future of communism.

In 1986 he wrote a satire novel *Moscow 2042*, which satirized Aleksandr Solzhenitsyn and the Soviet penchant for ludicrous rules. In this novel, Voinovich predicted that Russia will be ruled by the "Communist Party of State Security" which combines the KGB, Russian Orthodox Church and the Communist party. This party is led by a KGB general Bukashin (name literally meaning "the insect") who met main character of the novel in Germany.
