Early version of the Myford Super 7.

Continued: Super 7: General

Specification and comparison with the ML7 When it appeared in late 1952 it was immediately obvious that the Super 7, although built with the same bed-way dimensions as the ML7, was a thoroughly re-engineered design, with many significant improvements.

Myford Manuals User Guides - CNC Manual

Myford Super 7 Plus "Big Bore" Although designed in the late 1950s, it was not until the Summer of 2001 that the last (Mk. 3) version of the Super 7 lathe was introduced. Welcomed as a long-overdue development of this classic lathe, it had a larger and stiffer spindle able to pass a 1-inch diameter bar (formerly limited to 0.75"), a M42.5 x 2 mm pitch nose and a 4 Morse taper socket.

Myford Ltd Home Page (British Engineering at its best)

The lathe continued in production until 1979 and, because the design was so right to begin with, only very minor changes in specification were made over the years with the same design of cross and top slide units surviving until the late 1990s on the Super 7 based ML7R model. All Myford ML7 lathes included a K prefix in their serial number ...
