Nuclear Forensic Analysis: Kenton J. Moody, Patrick M. ...

Kenton J. Moody is with the Nuclear Chemistry Division at Lawrence Livermore National Laboratory (LLNL), where he is a technical leader for the application of nuclear and radiochemical techniques to problems in national security and the U.S. nuclear stockpile. He also performs basic research on the heaviest elements.

Amazon.com: Nuclear Forensic Analysis eBook: Kenton J. ...

—Chemistry Professor W. F. Kinard, College of Charleston, in The Journal of Forensic Sciences. About the Author. Kenton J. Moody is with the Nuclear Chemistry Division at Lawrence Livermore National Laboratory (LLNL), where he is a technical leader for the application of nuclear and radiochemical techniques to problems in national security and the U.S. nuclear stockpile.

Nuclear Forensic Analysis - Kenton J. Moody, Patrick M. ...

This book provides a primary reference source for nuclear forensic science, including the vastly disciplinary nature of the overall endeavor for questioned weapons of mass-destruction specimens. Nothing like this exists even in the classified material. For the first time, the fundamental principles ...

Nuclear Forensic Analysis, Second Edition / Edition 2 by ...

"Nuclear Forensic Analysis provides a multidisciplinary reference for forensic scientists. The book consolidates fundamental principles of nuclear forensic analysis, all pertinent protocols and procedures, computer modeling development, interpretational insights, and attribution considerations, into one convenient source."

Nuclear forensic analysis (Book, 2015) | WorldCat.org

Now in its second edition, Nuclear Forensic Analysis provides a multidisciplinary reference for forensic scientists, analytical and nuclear chemists, and nuclear physicists in one convenient source. The authors focus particularly on the chemical, physical, and nuclear aspects associated with the production or interrogation of a radioactive sample.

D M Grant | Get Textbooks | New Textbooks | Used Textbooks ...

Nuclear forensics is the investigation of nuclear materials to find evidence for the source, the trafficking, and the enrichment of the material. The material can be recovered from various sources including dust from the vicinity of a nuclear facility, or from the radioactive debris following a nuclear explosion .
