~~Perceptrons: An Introduction to Computational Geometry by ...~~

Perceptrons: An Introduction to Computational Geometry Marvin Minsky , Seymour A. Papert  
Perceptrons —the first systematic study of parallelism in computation—has remained a classical work on threshold automata networks for nearly two decades.

~~Perceptrons An Introduction To Computational~~

Perceptrons: an introduction to computational geometry is a book written by Marvin Minsky and Seymour Papert and published in 1969. An edition with handwritten corrections and additions was released in the early 1970s. An expanded edition was further published in 1987, containing a chapter dedicated to counter...

~~Perceptrons. An Introduction to Computational Geometry ...~~

The first systematic study of parallelism in computation by two pioneers in the field. Reissue of the 1988 Expanded Edition with a new foreword by Léon Bottou. In 1969, ten years after the discovery of the perceptron—which showed that a machine could be taught to perform certain tasks using examples—Marvin Minsky and Seymour Papert published Perceptrons, their analysis of the computational ...

~~Perceptrons: An Introduction to Computational Geometry by ...~~

In 1969, ten years after the discovery of the perceptron—which showed that a machine could be taught to perform certain tasks using examples—Marvin Minsky and Seymour Papert published Perceptrons, their analysis of the computational capabilities of perceptrons for specific tasks. As Léon Bottou writes in his foreword to this edition ...

purpose of this book is to present a mathematical theory of the class of machines known as Perceptrons. The theory is carefully formulated and focuses on the theoretical capabilities and limitations of these machines. It is a remarkable book.

~~A review of "perceptrons: An introduction to computational ...~~

This is the aim of the present book, which seeks general results from the close study of abstract versions of devices known as perceptrons. A perceptron is a parallel computer containing a number of readers that scan a field independently and simultaneously, and it makes decisions by linearly combining the local and partial data gathered ...
