15.1 Psychosocial Skills as Effective Predictors of Academic Success It is no longer disputed that psychosocial skills explain and predict important academic, workplace, and life outcomes. The relative predictive power of these constructs is often discussed in conjunction with that of cognitive skills. Although cog-

Life skills education and schools. In India, education has become institutionalized. Schools need to be recognized as the single most important and recognized forum to reach out to the young population. Any program to reach the adolescents/youth has to be incorporated into the educational system to be feasible, effective, and cost-effective.
