Chapter 21 Magnetism Section 21.2 Electromagnetism (pages 635–639) This section describes how electricity and magnetism are related. It discusses uses of solenoids and electromagnetic devices, and describes how these devices work. Reading Strategy (page 635) Identifying Main Ideas Copy the table on a separate sheet of paper. As you

The last page of each section of the Guided Reading Workbook ends with a graphic organizer that will help you better understand the information in the section.

~~|CK-12 Foundation~~

Section 18.2 The Electromagnetic Spectrum (pages 539–545) This section identifies the waves in the electromagnetic spectrum and describes their uses. Reading Strategy (page 539) Summarizing Complete the table for the electromagnetic spectrum. List at least two uses for each kind of wave.

~~Read Chapter 21 Magnetism Section 21 2 Electromagnetism ...~~

Chapter 21 Magnetism 21.1 Magnets and Magnetic Fields (6 Questions and Answers in Complete Sentences) A magnet is the source of a magnetic force. This force is exerted on other magnets, on iron or a similar metal, or on moving charges. Magnetic force acts over a distance but weakens as you move farther away from the magnet. Poles are regions of a magnet where the force is strongest.

Chapter 18 The Electromagnetic Spectrum and Light Physical Science Reading and Study Workbook ... Section 18.2 The Electromagnetic Spectrum (pages 539–545) This section identifies the waves in the electromagnetic spectrum and describes their uses. Reading Strategy (page 539) Summarizing Complete the table for the electromagnetic spectrum.

~~Chapter 21 Magnetism Section 21.2 Electromagnetism~~

21.2 Electromagnetism • Electricity and magnetism are different aspects of a single force known as the electromagnetic force. • The electric force results from charged particles. The magnetic force usually results from the movement of electrons in an atom. Moving electric charges create a magnetic field.

~~Section 21.2 Electromagnetism Workbook~~

Section 21.2 Electromagnetism (pages 635–639) This section describes how electricity and magnetism are related. Uses of solenoids and electromagnetic devices are discussed, and a description of how these devices work is presented. Reading Strategy (page 635) Identifying Main Ideas Copy the table on a separate sheet of paper.
