**Bonobo and the Atheist Book Review | Frans de Waal**  
In this lively and illuminating discussion of his landmark research, esteemed primatologist Frans de Waal argues that human morality is not imposed from above but instead comes from within. Moral behavior does not begin and end with religion but is in fact a product of evolution.

The Bonobo and the Atheist. In Search of Humanism Among the Primates / Istoki morali. V poiskah chelovecheskogo u primatov (In Russian)

**Frans de Waal's 'The Bonobo and the Atheist' tells what ...**  
His 2013 book The Bonobo and the Atheist examines human behavior through the eyes of a primatologist, and explores to what extent God and religion are needed for human morality. The main conclusion is that morality comes from within, and is part of human nature. The role of religion is secondary.

**The Bonobo And The Atheist**  
Rich with cultural references and anecdotes of primate behavior, The Bonobo and the Atheist engagingly builds a unique argument grounded in evolutionary biology and moral philosophy. Ever a pioneering thinker, de Waal delivers a heartening and inclusive new perspective on human nature and our struggle to find purpose in our lives.

**The Bonobo and the Atheist | Book - Emory University**  
In The Bonobo and the Atheist, de Waal introduces a second chimpanzee species, the female-led bonobo. Unlike the more aggressive chimpanzee, bonobo society is far less competitive and tension is dissipated by near-constant sexual activity as opposed to aggression.

The Bonobo & the Atheist. "Frans de Waal offers us a wealth of inspiring observations from the animal realm, combined with thoughtful reflections on the evolution of morality. He makes a convincing case for the natural foundations of a secular ethics that is fully independent of religion without being dogmatically against it." "Frans de Waal's new...

Behaving like animals: The Bonobo and the Atheist. This has been seen in animals as diverse as capuchins, elephants, canids and corvids. They co-operate and form social ties, both of which improve survival chances. Female baboons with the best social ties have the most surviving offspring, for example.
