Financial Times

Bookstaber criticizes modern economic theory, especially its reliance on the idea of a natural equilibrium in human affairs and its use of models that assume that households will always maximize their utility based on unchanging preferences. As aesthetically pleasing and occasionally useful as such theoretical constructs may be, human life does not conform to them.

The End of Theory : Financial Crises, the Failure of ...

A financial crisis is any of a broad variety of situations in which some financial assets suddenly lose a large part of their nominal value. In the 19th and early 20th centuries, many financial crises were associated with banking panics, and many recessions coincided with these panics. Other situations that are often called financial crises include stock market crashes and the bursting of ...
