nectar and/or larval food plants. So you can make the desert tortoise habitat work double duty as a butterfly garden.

Sonoran Desert Tortoise (*Gopherus morafkai*) - Reptiles of ...  
The Morofka's desert tortoise (*Gopherus Morafkai*) resides in the Sonoran deserts of Arizona east of the Colorado river and Mexico. The 2 species can interbreed and many of the captive tortoises in the Phoenix area are hybrids, which can only be determined by genetic testing. Wild desert tortoise populations are threatened by development and destruction of natural habitat.

Sonoran Desert Tortoise | UAPress

The Sonoran Desert Tortoise is entirely terrestrial. It shelters and hibernates in self constructed burrows that are often excavated under large rocks. It uses its strong, paddle-like forelimbs to dig. Also shelters in naturally occurring cavities under rocks or in the

diet, as the more food items they consume, the better off they are. I think you should continue adding moistened tortoise diet, and perhaps chopping the vegetables into small enough pieces that the romaine isn't immediately identifiable as such to your Sonoran desert tortoises.

## AZGFD

One of the most recognizable animals of the Southwest, the desert tortoise (*Gopherus agassizii*) makes its home in both the Sonoran and Mohave Deserts, as well as in tropical areas to the south in Mexico. Called by Tohono O'odham people "komik'c-ed," or "shell with living thing inside," it is one of the few desert creatures kept as a domestic pet—as well as one of the most studied reptiles in the world.
