LifeSafer Ignition Interlock User Guide

in this user manual. The use of non-specified power supplies or power cables may create a safety hazard and/or impair equipment performance. Do not wrap cords around power supply for storage. Do not drive, drag or place objects over cord. Doing so may lead to damaged cords and a failure to provide power to the concentrator.

If two parallel main stop valves are installed for steam turbine, blow steam is divided into two, upstream and downstream of the stop valve. The case can be analyzed by three run of ES\_BlowOut as below. First, run ES\_BlowOut for common temporary pipe from the stop valve to the end of temporary pipe, with full blow-out flow.

Blowing and making a “DO”, DEE” and “DAA” for a breath test will quickly become second nature to you. Do not blow too hard. Start the test blowing softly and increase your blowing pressure until you hear the tone that indicates you are blowing hard enough. Continue to blow steadily at that level for the length of the test. NOTE:
